

# Revenue Assurance is Supposed to be Just That. Invoice Shark Guarantees it.

Eliminates the time, expense and errors caused by manual processes that fail to capture pricing errors, irregularities and revenue enhancers, such as incorrect destinations, origins or content;

Provides advanced tools to 'group and match' incoming statements with price lists and rated traffic, along with the capability to account for multiple billing periods, partial payments, mid-cycle rate changes and amendments;

Open interface ensures fast deployment and integration to Accounting Systems, along with easy access over B2BSimpleX -- **winner of the Best Service Innovation at the 2014 Global Carrier Awards** -- or as an add-on using Microsoft Windows.

Automatically validates and sorts discrepancies for fast resolution ~ dispute letters generated with a simple click;

Utilizes easy-to-use validator for automated dispute and payment processing to create full business clarity and contract transparency.
